

## Line Extension

# Grid-EYE Infrared Array Sensors Now With Higher Accuracy and Longer Detection Distance!

Panasonic is pleased to announce the expansion of Panasonic's line of Grid-EYE Infrared Array Sensors. These four new re-designed models offer a number of advancements over the original Grid-EYE, including higher accuracy, enhanced resolution, and longer detection distance, for true next-generation performance.

## Features

- Higher Accuracy of  $\pm 2.00C$
- Enhanced Resolution of 0.30C
- Longer Detection Distance of 7m
- RoHS/REACH Compliant

## Benefits

- Improved from  $\pm 2.50C$
- Improved from 0.50C
- Improved from 5M
- Environmentally Friendly

## Industries

- Computers / IT
- Lighting
- Industrial Electronics
- Automotive

## Applications

- DC to DC Convertors
- Inverter Circuits / Power Circuits
- Server Power Supply
- Automotive Entertainment System
