

New GT03-E Series Programmable Display

Programmable Display for Harsh Environments in a Compact 3.5in Body!

Panasonic, a world leader in Industrial Automation Products, is pleased to announce the addition of the **GT03-E Series** Programmable Display to the GT Tough Series. A high resolution, waterproof touch screen and the ability to withstand a wide range of temperatures makes this device ideal for work in extreme weather conditions. The high contrast display is treated with an anti-glare coating for superior outdoor performance. With this dynamic series, the user can transfer a PLC program without using a PC, resulting in increased efficiency and diminished maintenance time. Unique features such as SD logging functions, data management with recipes and user-friendly macros, advanced graphics, and hassle-free configuration make this programmable display essential for PLC control in any environment.

Features

- Multiple Languages Supported
- Resistant to Extreme Temperatures
- UV Ray Resistant
- Waterproof Display
- RoHS Compliant

Benefits

- Useful Across International Applications
- Functional in Various Environments
- Long Display Life with Visibility through All Seasons
- Reduced Panel Size

Industries

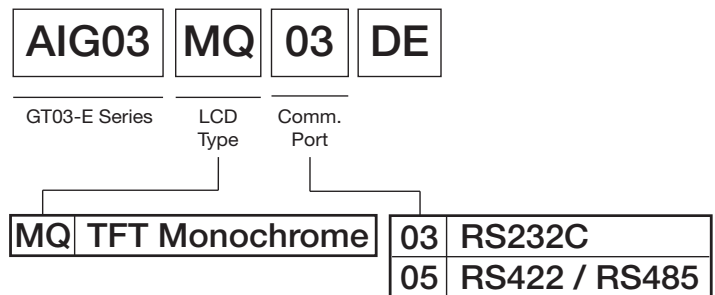

- Packaging/Processing
- Machine Tools
- Marine Systems
- Automotive
- Retail

Applications

- Furnaces/Boilers
- Vending Machines
- POS Kiosks
- Dairy/Beverage Manufacturing
